Expertise
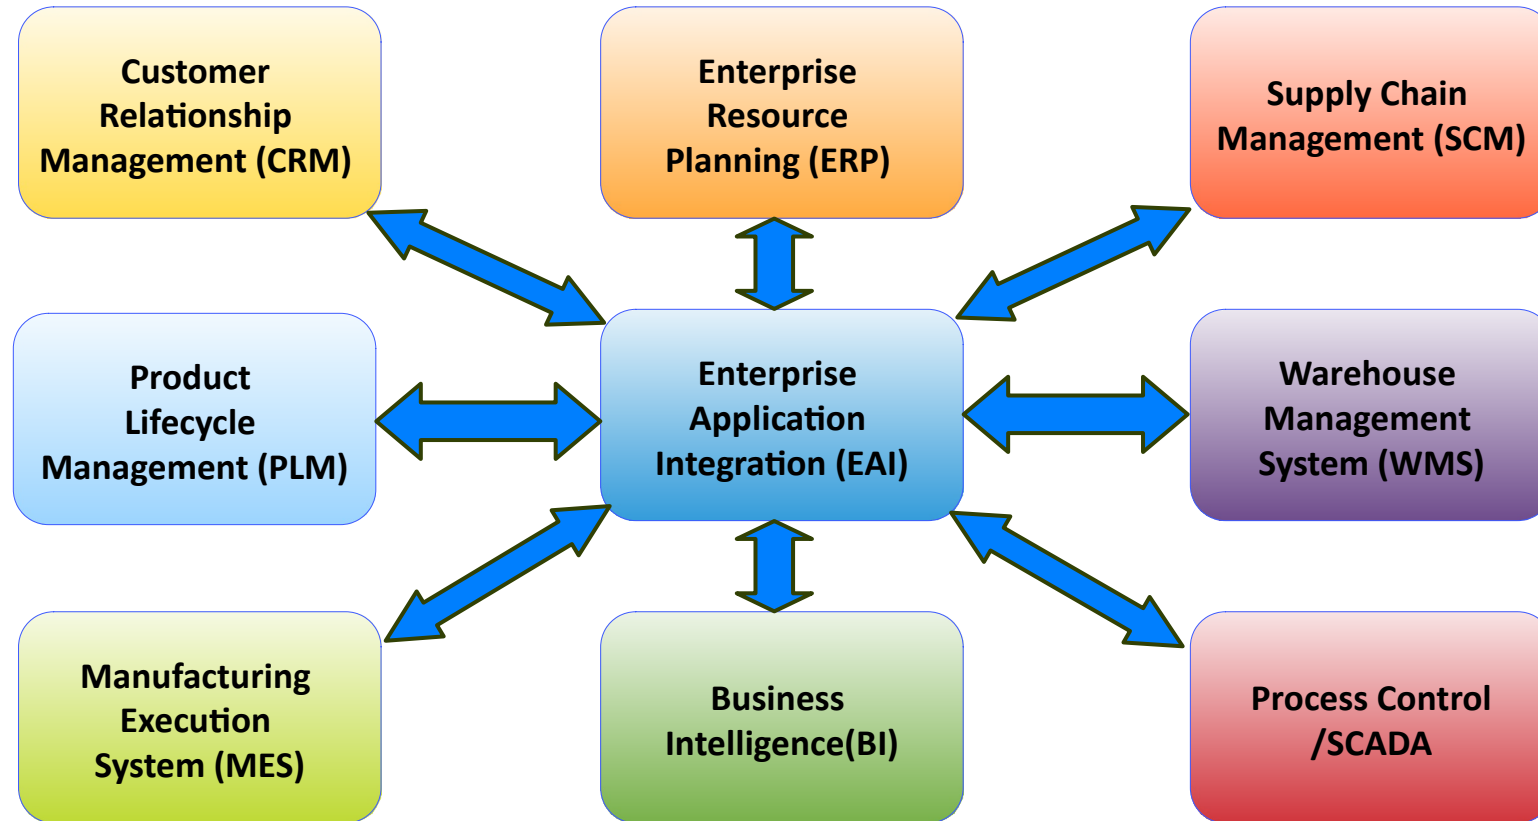

* Software Development, Consultation and Maintenance

* Cloud, Cloud Security, DevOps

* Enterprise Application Integration: SAP/ERP, PLM, CRM, MES, GIS, GPS, SCM, WMS..

* IoT

* Digital Manufacturing and Industry 4.0

* GIS Development

* Data Science, Machine Learning, Artificial Intelligence

* Preventive Maintenance and Predictive Analysis

* Kiosk Software and Hardware Development

* RPA (Robotic Process Automation)

Enterprise Application Integration

Customer Relationship Management (CRM)

Enterprise Resource Planning (ERP)

Supply Chain Management (SCM)

Product Lifecycle Management (PLM)

Enterprise Application Integration (EAI)

Warehouse Management System (WMS)

Manufacturing Execution System (MES)

Business Intelligence(BI)

Process Control /SCADA

Generic Solutions

* Keep DB Safe: Database synchronisation software for small banks

* Document Management System

* Smart Backup: Automated Data Backup solution

* Smart Backup Cloud: Automated Data Backup solution to Cloud

* OCR based solutions: Automated Scan and Upload invoices and related documents to Invoicing/Billing software

* Smart Machine Vision System: Anomaly Detection

* MES Customisation and Development

Automotive Solutions

* **Smart Parking:** Vehicle parking solutions for automotive industry.

* **Process Engineering:** Analysing assembly line process.

* Vehicle Dispatch System

* Component Packaging Management Solutions

* RFID based Job Card System

* Tool Tracking System

* Smart Supply-chain solutions

* SOP Display System across Assembly line

* PokaYoke(mistake-proofing) System for item picking

Embedded Applications

* Embedded Applications

* Location based devices using GPS, mobile phones

* Wireless data transfer using GSM, RF, Bluetooth, RFID tagging

* Microcontroller based systems

* Wireless(RF) Digital Dial Gauge/Vernier to Excel

* PokaYoke Applications
